

# No Location Events

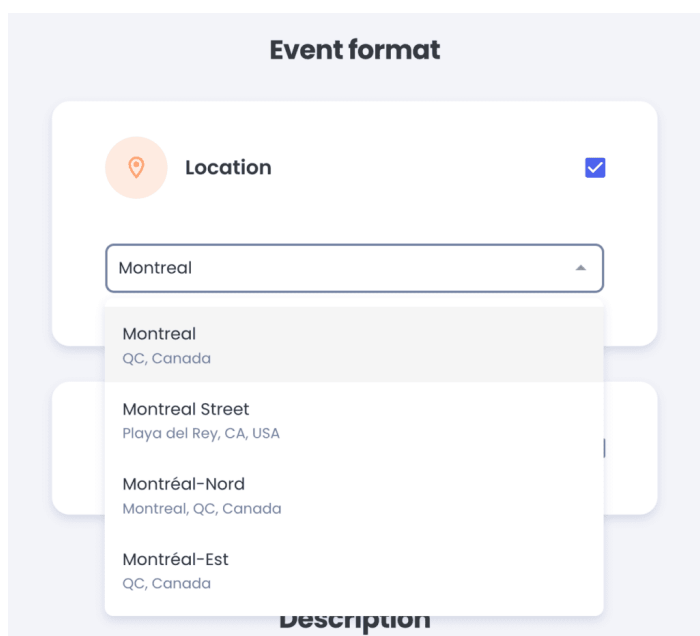

Sometimes events do not yet have a location, or will never have a location.

Currently Jlive does not allow for In-person events without a set Location. This is a Coming Soon feature.

In the meantime, you could set an arbitrary location and indicate in the description or in a follow-up message that the location is still TBD.

## How to do this:

In **Create Event - Step 1**, enter a generic address such as “Montreal”

The image shows a screenshot of a form titled "Event format". The form has a "Location" field with a location pin icon and a checkmark. The field contains the text "Montreal". A dropdown menu is open below the field, showing four suggestions: "Montreal QC, Canada", "Montreal Street Playa del Rey, CA, USA", "Montréal-Nord Montreal, QC, Canada", and "Montréal-Est QC, Canada". Below the dropdown menu, the word "Description" is partially visible.

Set the **Venue Name** and **Address** to something vague such as “**Location TBD**”

### Event format

 **Location**
