# Release Forms
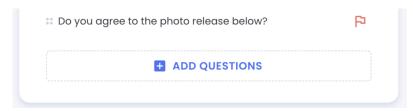

There are multiple ways to add Release Forms to events.

OPTION 1: Include a Registration Question to Agree to the Release

1) On The **Create Event / Questions** step, create a question with a **link to the Photo Release form** in the Description. You would need to host the form online someplace (Dropbox, Google Drive etc.) in order to link to it.

Then choose **Single answer** with "**Yes**" being the only possible answer.

2) Then make sure to set the question to be a **Required** question by clicking the red flag.

3) Here is how it looks in the Registration form. Since the question is required, you can only proceed if you choose "Yes".

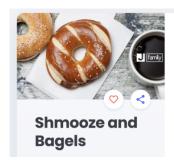

OPTION 2: Add a link on the Event Details Page

Alternatively, On **Create Event / Event Details** step, you could put a link on the Event Details page in the **Additional Info / Forms section** like this:

Here is how it would look on the Event Details page:

Shmooze and Bagels
