

Reminder Emails

By default, Jlive sends automatic Reminder Emails for each event. However, this can easily be disabled for a particular event if you want.

How to Disable Reminder Emails

On the “Access and Privacy” step of the event creator, there is a “Reminder Email” section. Here you can enable / disable the Reminder E-mails that are sent 1 hour and 48 hours before the start of your events.

Reminder emails

1 hour before the event start

Reminder will be sent 48 hours before event start

☐

Reminder will be sent 1 hour before event start
