

Use third party registration form

It is possible to list your event on Jlive, but link people to an external registration form when click to Register. To enable 3rd Party Links, please reach out to support@jlive.app to get this feature enabled for your organization.

Once 3rd Party Links is enabled, then when you are on the Create Event / Tickets in the Settings box at the bottom will be a check box called **Use 3rd Party Link**. Here you can paste the URL to your Registration Form.

The screenshot shows the 'Ticket Settings' interface. At the top, there is a gear icon and the title 'Ticket Settings' with a subtitle 'Set Ticket Fees, Button Text and Promo code'. Below this, there is a section for 'Button Text' with a dropdown menu currently set to 'Sign-up'. The next section is 'Use 3rd party link', which has a checked checkbox and the text 'Enable people to get tickets on a 3rd party website.' Below this is a descriptive paragraph: 'Choose this option if you want people to get tickets on a 3rd party website. If so, you will not be able to offer Tickets, Addons or Registration Questions on JLIVE.' At the bottom, there is a text input field containing the URL 'https://www.myevent.com'.

Using 3rd Party Links will completely bypass the Jlive registration flow and Jlive will not be able to know who registers to your event and will not be able to provide any reporting.
